## **POTENTIAL RISK OF MOSQUITO BREEDING**

The Management have received numerous of feedback in regards of the mosquitoes found in their unit and common area. As part of a responsible homeowner, the Management urge everyone to do their part in the combat against this sudden rise in mosquito breeding at Dover Park View.

### Preventive Checklist to a Mozzie-free home: -

Turn pails and watering cans over and store them under shelter.

- ✓ Loosen soil from potted plants to prevent the accumulation of stagnant water on the surface of the hardened soil.
- ✓ Do not block the flow of water near the floor trap.
- ✓ Trays or receptacles should not be placed beneath or on top of any air-conditioning unit as they may create conditions favorable for mosquito breeding.
- ✓ Remove water in plant pot plates. Clean and scrub the plate thoroughly to remove mosquito eggs. Avoid the use of plant pot plates, if possible.
- ✓ Change water in flower vases. Clean and scrub the inner sides of vases. Wash roots of flowers and plants thoroughly as mosquito eggs can stick to them easily.
- ✓ Clear fallen leaves and stagnant water in your scupper drains and garden. These leaves could collect water or cause blockages to the drains, thus resulting in the buildup of stagnant water.

We would like to seek the cooperation of all residents joining effort in elimination of mosquito from our estate.

Thank you for your co-operation.

Yours faithfully,  

Ruby Ong
