To: All Residents of La Fiesta

VEHICLE JUMP START KIT AVAILABLE @ GUARD POST

The Management has received several feedbacks of vehicles experiencing difficulties starting engines in the La Fiesta Basement Carpark. One of the common reasons for this issue is the depletion of the vehicle's battery.

To assist our residents in such situations, we are pleased to announce that we have made vehicle jump-start kits available for loan at the Security Guard Post. These kits are provided for the convenience of all residents, and we kindly request your cooperation in using them responsibly and ensuring their proper return to the Guard Post in working condition after use.

We have implemented a mandatory sign-out process to maintain a record of the usage of these jump-start kits and ensure accountability for those who borrow them. To borrow a jump-start kit, please follow these steps:

1. Visit the Security Guard Post.
2. Sign out the jump start kit by scanning the provided QR Code.
3. Fill out a brief form with your details.

By following these simple steps, you will help us keep track of the number of times the device is used and ensure that it remains readily available for all residents in need.

Your cooperation in carefully handling the jump start kit and promptly returning it to the Guard Post after use is greatly appreciated.

Together, we can collaborate to enhance the convenience and efficiency of La Fiesta for all our residents.

Thank you for your understanding and support.

Yours Faithfully,

Jasmin Teo (Ms.)
