

Charging via app location

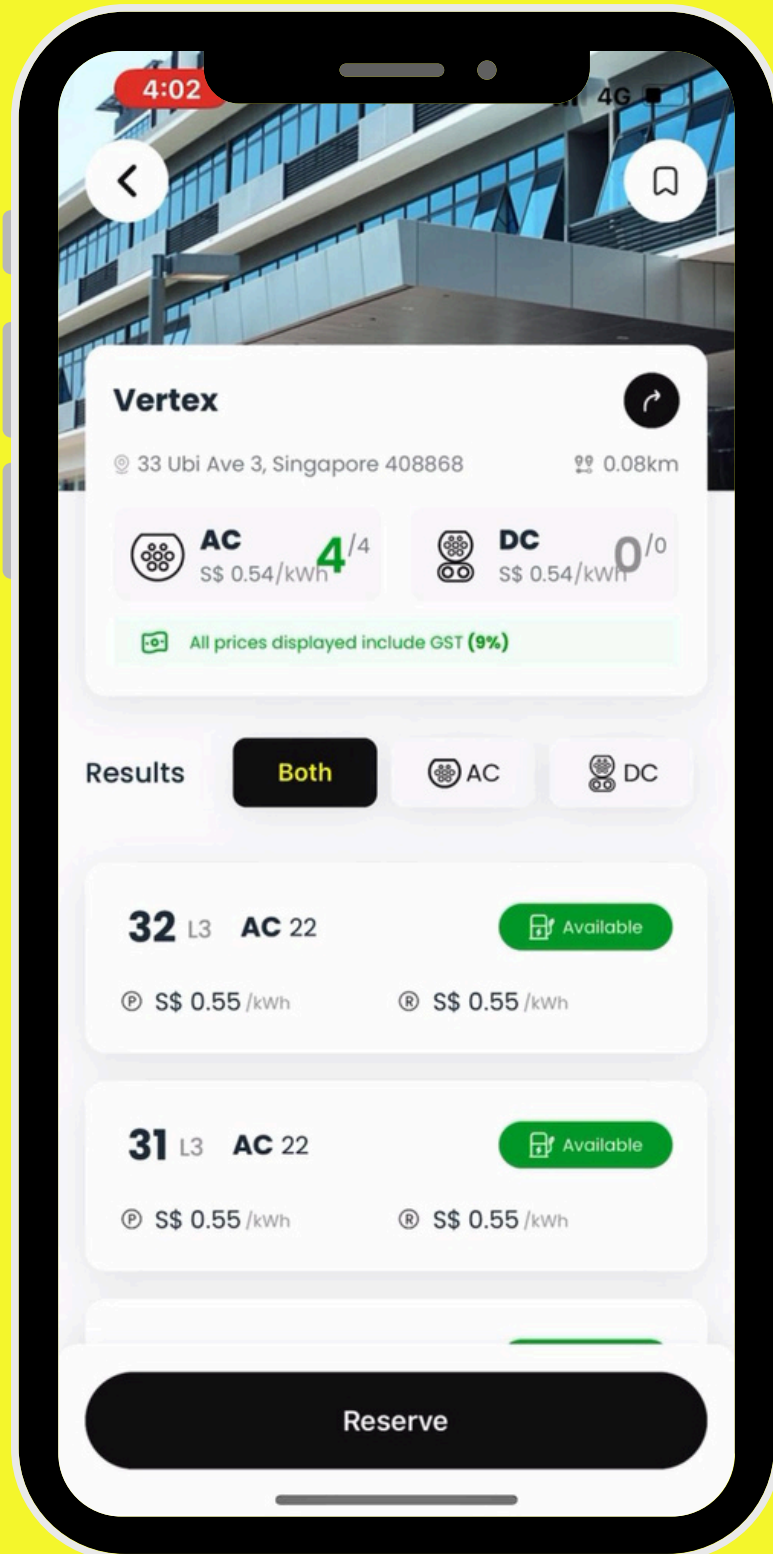

Plug in the connector and lock the car

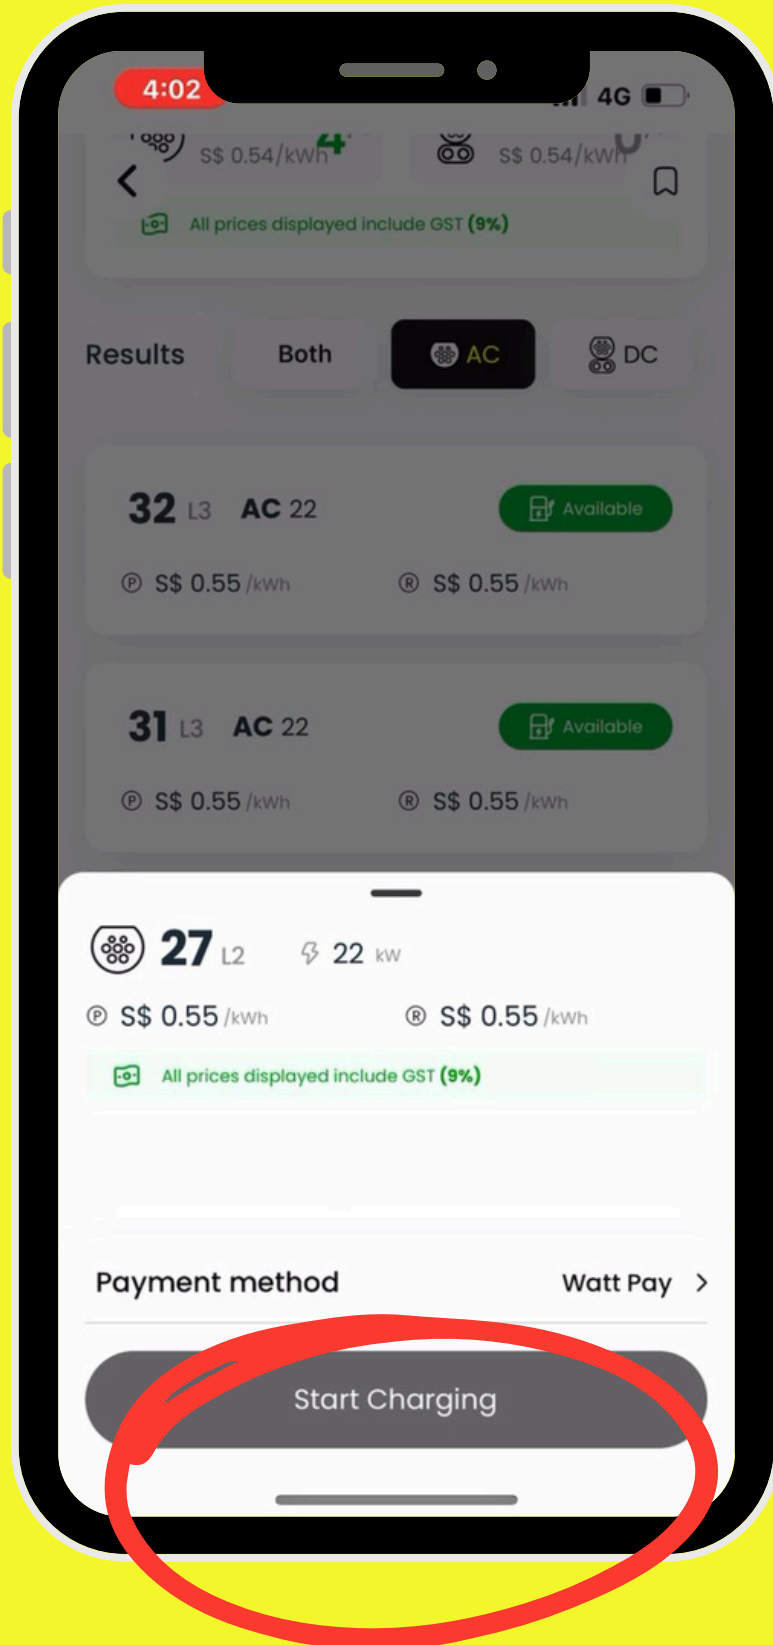

Open the WATT app
Tap on “search”

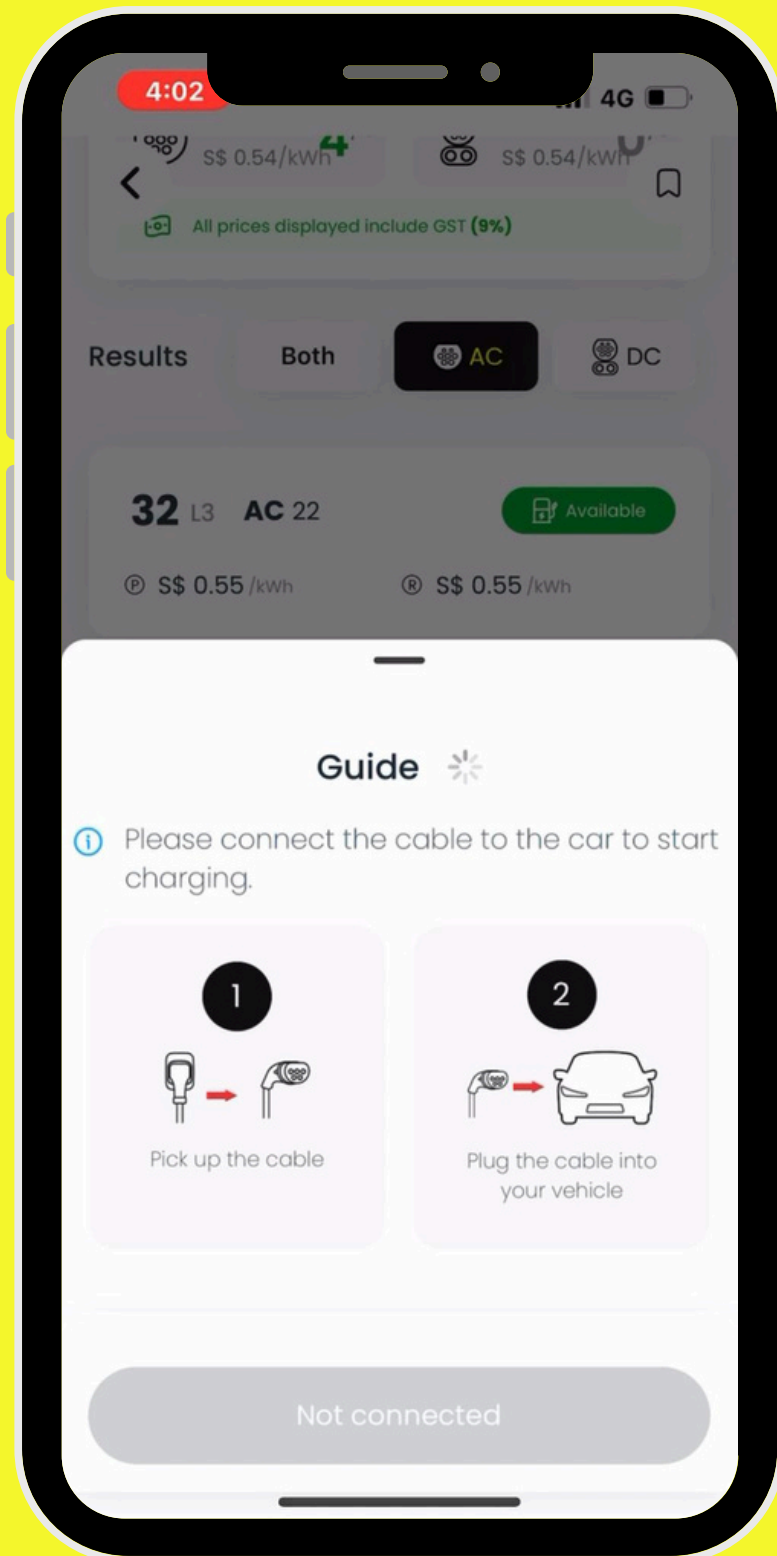

Type in the location you wish to search for
the charge point

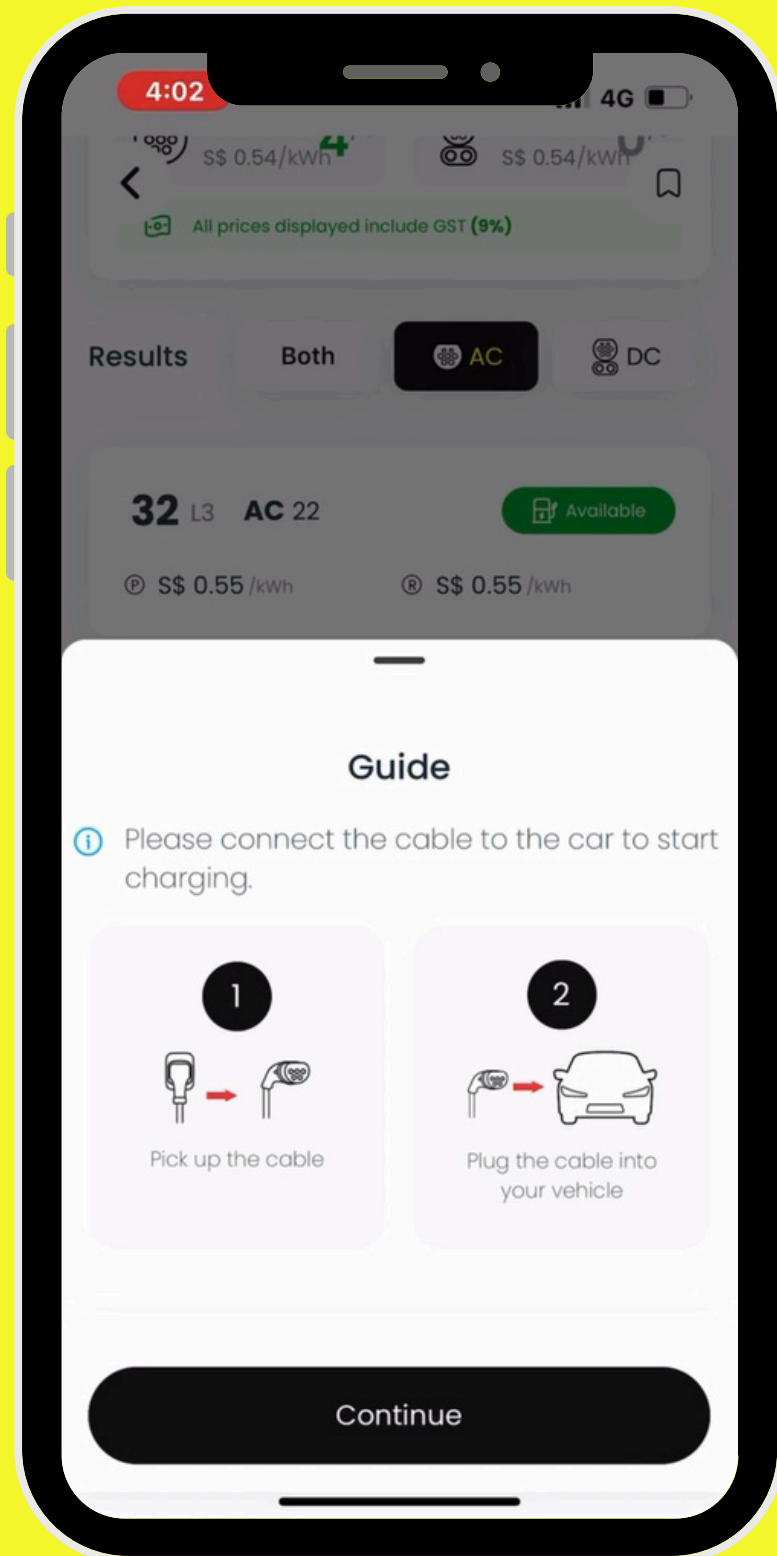

Select the location and scroll to see the available lots for charging

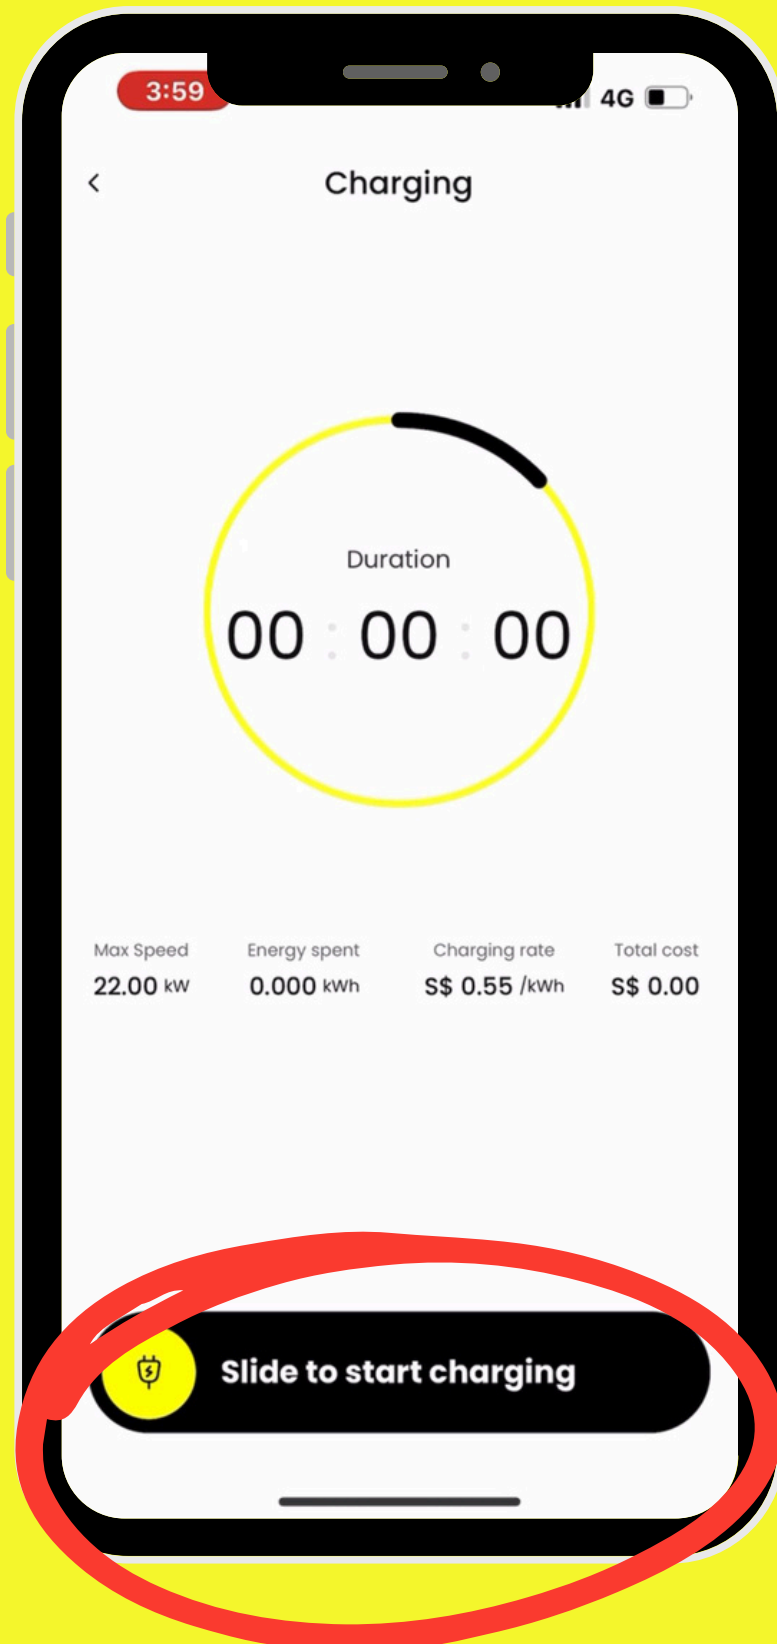

Select a lot number and then tap “start charging”

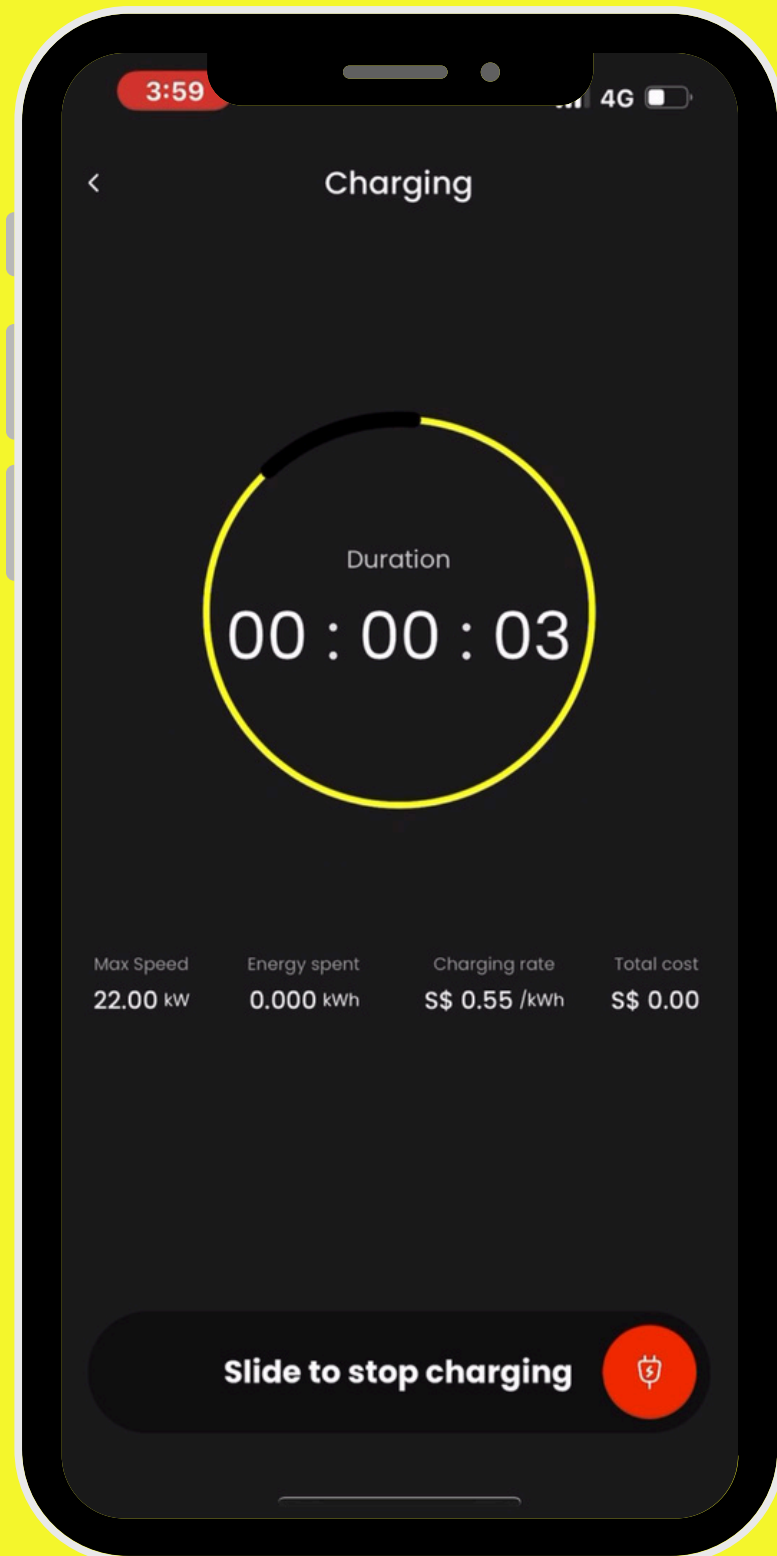

Ensure the cable is already plugged into your car

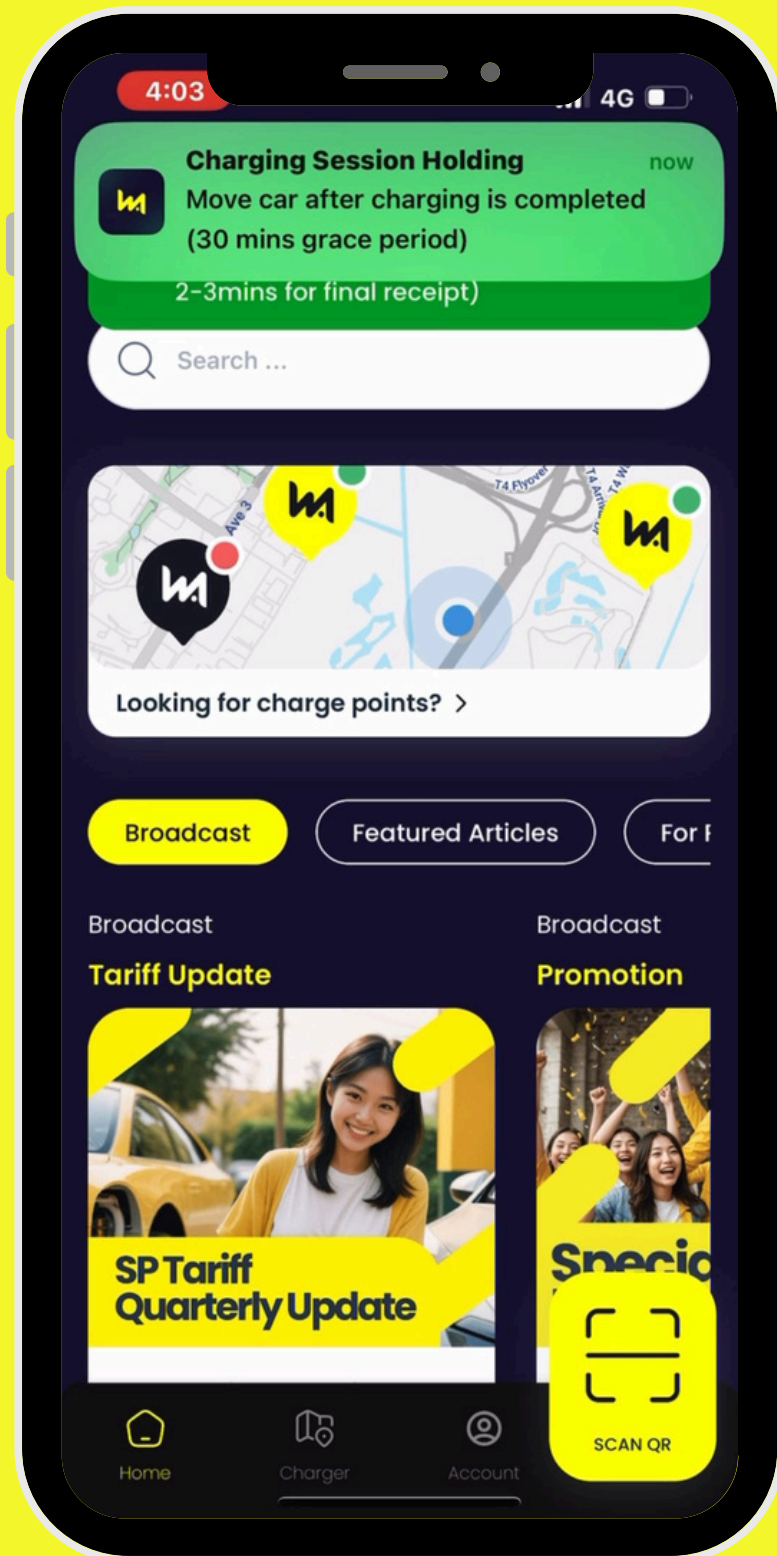

Tap “continue”

Slide to start charging

To stop charging, go to the app and slide to stop charging

Once the charging is stopped , you will receive a notification to move your car away from the lot within the given idling period

Unlock car and unplug the connector
before coiling and putting it back
