NOTICE

Ref: CIR/015/18122023

18th December 2023

Attention: **All Subsidiary Proprietors & Tenants of Livia**

Dear Sir / Madam,

Educational Notice

Subject: Minimizing the Impact of Dog Urine on Plants and Estate Premises

Dog urine contains high levels of nitrogen, which can be detrimental to our cherished plants.

Excessive nitrogen has the potential to cause plant damage and even lead to their demise. In cases where exposure is significant as highlighted in photographs below, soil replacement and/or the addition of new soil/fertilizers may be necessary, incurring additional costs and efforts.

To foster a harmonious living environment and ensure the well-being of our green spaces, we kindly request the cooperation of all dog owners to refrain from allowing their dogs to urinate on the plants.

We strongly **suggest all dog owners to carry large sized water bottles** to promptly dilute any affected areas when their dogs pee.

Sample indicating impact of Nitrogen

Actual Photograph of impact caused to the plants

Let us collaborate to uphold a beautiful environment that everyone can enjoy!

Thank you for your understanding and cooperation.

Yours sincerely,

Remy (Mr)
